Saturday, January 10, 2015
12 Noon ~ Wiggins, Mississippi

Log on to www.TannerFarms.net for
more information and videos of bulls selling!

The Tanner Family

*Tanner
Farms*

Dear Friends

We're pleased to invite you to the **Tanner Farms Angus and SimAngus 2015 Bull Sale**. This sale will be held at Noon on Saturday, January 10, 2015, in Wiggins, Mississippi, at the former 7L Farms Facility.

We are selling a powerful set of 80 Angus and 70 SimAngus, 14-16 month old, bulls ready to go to work! These bulls are accustomed to the heat and humidity of our south Mississippi climate and are bred for growth with maximum feed efficiency. They have been fed a forage based, high fiber ration and have been performance tested so that only the best will be offered on sale day. All of our bulls will have ultrasound data and come with complete EPD information. You can release these bulls into your herd with confidence because they have been Trich tested and soundness tested within 30 days of the sale. All are guaranteed fertile and all sell with a 100% guarantee.

We are happy to offer personalized service to our customers and will help you select a bull that will best meet your specific needs. **We also offer free delivery with the purchase of three or more bulls.** Call or come by the farm and we will be glad to assist you.

We invite you and your family to join us in Wiggins on sale day for good food, fellowship, and Southern hospitality. Lunch will be served at 10:30 am.

Hope to see you there!

Gary & Lorie Tanner

Andrew, Amelia and Sophia Roberts, Paisley and Penny Tanner

Gary and Lorrie Tanner

*"Praise the LORD, oh, my soul;
all my inmost being, praise His Holy name.
Praise the LORD, oh, my soul;
and forget not all His benefits-
who forgives all your sins, and heals all your diseases,
who redeems your life from the
pit and crowns you with love and compassion,
who satisfies your desires with good things
so that your youth is renewed like the eagle's.
The LORD is compassionate and gracious,
slow to anger, abounding in love.
He does not treat us as our sins deserve
or repay us according to our iniquities.
As a father has compassion on his children,
so the LORD has compassion on those
Who fear Him." Ps. 103: 1-5, 8, 10, 13*

*We praise Him for who He is and all His mighty
deeds, may He be honored and glorified in all we do!*

COMMENTS FROM THE SALE MANAGER:

The Southeast's Largest Seedstock Source!

Once again it is a genuine pleasure and privilege to work with Gary and Lorrie Tanner, their family and crew, in the presentation of the Tanner Farms Pasture Performance-Tested Angus and Sim-Angus Bull Sale, set for January 10, 2015. An outstanding set of bulls will sell, ranging from 14-16 months of age that are semen-tested and backed by leading AI sires. These bulls are backed by a 100% satisfaction guarantee and are ready to go to work. The depth and dimension of this offering is impressive.

Times have never been better in the beef cattle business than they are now. The demand for your Angus genetics continues to look brighter than ever. Plan now to be on hand for this important event. Everyone at Tanner Farms looks forward to having you as their guest.

Please feel free to call on us at the American Angus Hall of Fame if we can be of assistance in any way.

Sincerely,

TOM BURKE

Association Perspective
Low-birth-weight EPDs
Looking at a single trait on EPDs costs performance and money.

by **David Gazda**,
 regional manager,
 American Angus Association

One of the most common concerns I hear from commercial producers using Angus genetics is the size of calves at birth. Instinctively, my first thought is that the producers experienced calving problems due to the calves being too large at birth. However, the problem generally tends to be just the opposite, where the calves have been extremely small and light at birth, struggled to nurse and never caught up with their contemporaries from a growth standpoint.

Upon visiting with the producer and reviewing the bull's registration certificate and EPD profile, I usually discover a common theme – the producer had been selecting primarily for calving-ease, low-birth-weight-EPD bulls with no regard to any other traits. This is certainly understandable if the producer is breeding heifers and needs a certain level of calving ease delivered by low-birth-weight Angus bulls. Furthermore, in the southeast, like many other areas of the country where cow herds are relatively small, the herd bull may have to be multipurpose, breeding both heifers and mature cows with, again, emphasis being placed on calving ease.

At the risk of being controversial, many of these small calf scenarios could be eliminated if the producers would simply be willing to accept more birth weight, particularly when breeding mature cows. One only has to attend a production or test station sale to witness firsthand how the heavier-birth-weight-EPD bulls are penalized and therefore sell at a substantial discount. Have calving-ease and low-birth-weight EPDs been overemphasized to commercial producers? Maybe; maybe not.

Regardless, the commercial producer equates Angus genetics with calving ease, fertility, maternal strength and carcass quality, and as seedstock producers we are challenged daily to deliver those genetics.

In closing, producers need to select bulls that allow them to reach their production goals; however, single-trait selection based upon an individual's birth weight EPD may needlessly sacrifice additional pounds at weaning. Next time you are in the market for a bull, don't discriminate against a little more birth weight EPD. You will still receive the calving ease you have always expected from Angus and a few extra dollars in your pocket at weaning!
